Projects

QuickGPT – (AI Powered Assistant Platform):- 🌀

- Developed a AI assistant using React, Node.js, Express.js, MongoDB, and OpenAI API.
- Implemented JWT-based authentication to securely manage user access.
- Added a credit-based usage system with Stripe for controlled AI consumption.
- Built a responsive UI with conversation history and dark/light mode using Tailwind CSS.

MediNest – (Full-Stack Medical Platform):- 🌀

- Developed a multi-role medical appointment system using React, Node.js, Express.js, and MongoDB.
- Implemented JWT authentication and role-based access control for secure data handling.
- Built appointment booking and management features for patients and doctors.
- Integrated Razorpay payments and Cloudinary image uploads for real-world functionality.

ResumeCraft – (AI Powered Resume Builder):- 🌀

- Developed an online resume builder using React, Node.js, Express.js, and MongoDB.
- Integrated AI-powered resume generation using the OpenAI API.
- Designed customizable resume templates with a clean UI using Tailwind CSS.
- Implemented secure user authentication and resume export functionality.

Certifications

- Completed Full-Stack Web Development course (Apna College) and applying skills through real-world MERN projects.

Achievements & Hackathons

- Participated in AgriTech Hackathon 2025, focused on building innovative agricultural technology solutions.
